

The Presidential Search Committee met on April 19th and May 3rd. These meetings were primarily devoted to listening to members of the University community and reflecting on the many perspectives that have been shared in March, April and May in open sessions, via email, and in meetings with Faculty Councils, Senate, employee group leaders, student leaders, University officers, and the Board of Governors. All information has been shared with the Committee without attribution (except in cases in which individual attribution has been desired and requested).

The Committee has begun to develop advertising copy and the position profile, with the goal of posting the draft position profile on the Presidential Search page at the end of May. Members of the University community will be welcome to offer feedback on the profile in June. The Presidential Search Committee will reconvene at the end of June to consider the feedback and refine the draft position profile into a final version that can be shared with candidates.

Members of the University community are welcome to continue to share their perspectives with the Presidential Search Committee via the confidential email: yorkupresident@caldwellpartners.com.
